<sup>2</sup>The figures are targets only and there is no guarantee they will be achieved. Per annum by reference to launch price of £1.00 per unit, payable quarterly, one month in arrears.

## Overview

VT RM Alternative Income Fund (the “Fund” or “RMAI”) seeks to provide income whilst preserving capital over the medium to long-term. The Fund seeks to meet its objectives by investing in listed equities and other transferable securities (including, REITs and Investment Trusts) whose primary activity or exposure is within the alternative income sectors - areas such as alternative lending (asset lending, direct lending, platform lending), Infrastructure and specialist real estate. In addition to investing in equities the fund may also invest in other transferable securities, including bonds, money market instruments or cash. The Fund will have a preference for investments denominated in sterling, with issuers which have activities and assets within the U.K., Europe, USA, Singapore or another OECD Country.

## Portfolio Activity

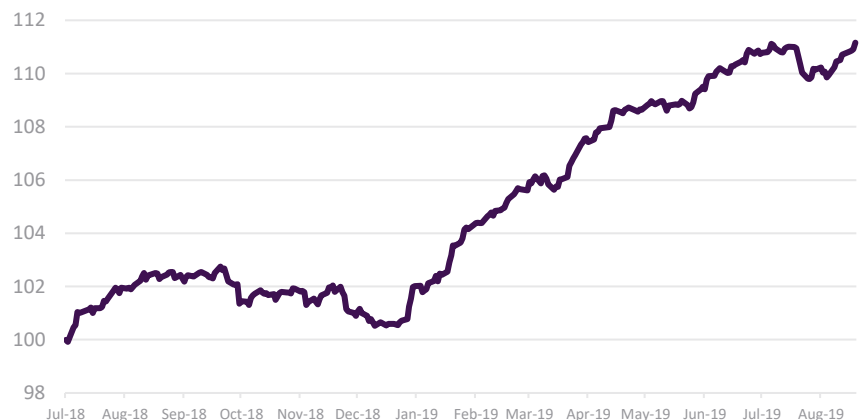

The Fund’s total return for the month of August was 0.46%. Since the Fund’s inception on the 11th June 2018, the net asset valuation per share of the VT RM Alternative Income Fund (the “Fund” or “RMAI”) has increased from £1 to £1.1116 net of fees. Fund data is based upon the VT RM Alternative Income Fund Institutional GBP accumulation class. The portfolio has investments across developed markets, primarily in the UK, but also including modest holdings in the US, Canada, Australasia and Europe. Currency exposures are largely hedged back into GBP.

August was a positive month for the fund’s performance. The investment team met with a couple of Management teams during the month – this is expected given the seasonal UK holidays.

During the month three holdings were added to the fund. Convenience REIT, a holding the fund had previously held, Charter Hall Education Trust, and Infratil Limited.

**Charter Hall Education Trust (“CQE AU”)** primarily operates 430 childcare nurseries in major cities across Australia. The Company has a wider mandate to invest across the social infrastructure segment which we expect will drive capital element of the total return moving forward. Our investment thesis is underpinned by a number of factors including 1) socio-demographic considerations, 2) healthy balance sheet with strong cash flow coverage, 3) long-dated assets with weighted average lease of c.9.9 years and 4) non-UK GBP / diversifier.

**Infratil Limited ("IFT NZ")** is a holding company which owns and operates a number of Australian and New Zealand based infrastructure assets in areas which the Portfolio Managers and Investment team believe are undergoing a significant period of structural change (digitisation of services, decarbonisation, ageing populations etc). The main holdings include renewables, telecommunications assets, care homes and data centres.

## Market Commentary

Volatility increased significantly during the period starting late July with sharp asset price moves across equities, credit and rates on the back of thin volume and continued concerns over the US/China trade war. More generally geo-politics and global macro data continued to dominate the narrative for the month. Looking towards Europe, German industrial production and the snap Italian elections caused significant risk-off trades within the Eurozone, driving the entire bund yield curve negative and prompting the ECB to consider introducing a further round of monetary stimulus.
