¹The Investment Manager of the Fund has undertaken to absorb any costs that would otherwise cause the class F/I/R shares of the Fund to have ongoing charges (excluding underlying collective investment undertaking holding charges) in excess of 0.45% (F) and 0.85% (I & R) respectively.

Due to FCA reporting requirements UCITS funds must now report synthetic costs from underlying investments within the OCF calculation (contained in the KIID). For the avoidance of doubt the cash amount charged by the Investment Manager has not changed.

²The figures are targets only and there is no guarantee they will be achieved. Per annum by reference to launch price of £1.00 per unit, payable quarterly, one month in arrears.

³ Fund data is based upon the VT RM Alternative Income Fund Institutional GBP accumulation class.

Overview

VT RM Alternative Income Fund (the “Fund” or “RMAI”) seeks to provide income whilst preserving capital over the medium to long-term. The focus is real asset investments across three sectors; Secured Real Assets, Infrastructure and Specialist Real Estate. The Fund seeks to meet its objectives by investing in listed equities and other transferable securities (including, REITs and Investment Trusts) whose primary activity or exposure is within the alternative income sectors. In addition to investing in equities the fund may also invest in other transferable securities, including bonds, money market instruments or cash. The Fund will have a preference for investments denominated in sterling, with issuers which have activities and assets within the U.K., Europe, USA, Singapore or another OECD Country.

Monthly NAV Performance & Dividend

The portfolio is comprised of liquid investments across developed markets, primarily in the UK, but also including modest holdings in the US, Canada, Australasia, and Europe. Currency exposures are largely hedged back into GBP. The fund’s percentage total return³ for the month of March was (3.88%). Since the Fund’s inception on the 11th of June 2018 the return has been 23.35% net of fees.

Portfolio Activity

The Portfolio Manager increased its position in **PHP: LN** during the period – there was no other investment activity during the period.

As previously noted, the bond investments have been structured in a laddered fashion (various maturity dates), with a significant percentage maturing in 2023, providing both an attractive running yield and pull-to-par. The next bond maturing is Thames Water in May, followed by Unite Group’s (Student Accommodation owner/operator) senior secured bonds in late June.

The focus remains on attractive non-cyclical assets which are supported by strong structural demand characteristics, such as energy security and demographic change.

Market Commentary

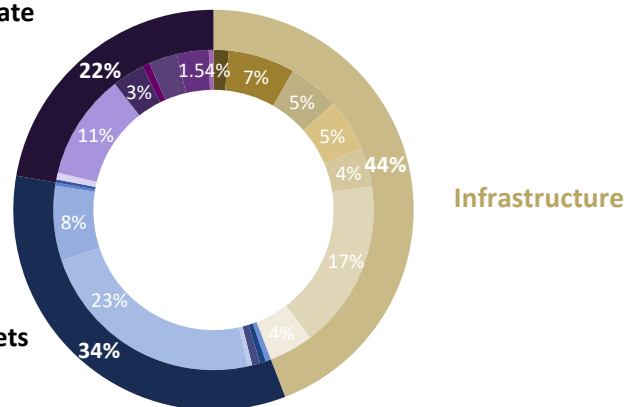

March was a volatile period for markets, with the collapse of various US Regional banks, predominantly driven by the effect of higher rates offered in the money markets vs deposits. Adding to the volatility was the rapid deterioration in Credit Suisse, with the regulator hastily arranging a takeover by UBS – the fall out in the AT1 market has not gone unnoticed by markets.

ETFs tracking the FTSE All-share generated total returns of c.(-3.00%) over the period, with the iShares Corp Bond (price return) +0.46% over the period.

Overall, market volatility remains elevated. Whilst equities are generally trading higher on the expectation that central bank monetary policy is taming inflation, the fact is that inflation remains too high in many developed markets – the UK, notably, appears to have particularly stubborn inflation, which could force the BOE to hike further.
