The Investment Manager of the Fund has undertaken to absorb any costs that would otherwise cause the class F/I/ shares of the Fund to have ongoing charges more than 0.50%. (F) and 0.60% (I) respectively.		
* Distribution yield represents the dividend paid over the last four quarters as a percentage of the GBP Income I class NAV the day following the ex-dividend date.		
Fund data is based upon the SVS RM Infrastructure Bond GBP F Accumulation Class.		

Overview

The investment objective of the SVS RM Infrastructure Bond fund, “RMIBF” or “the fund” is to provide income greater than Sterling Overnight Index Average (“SONIA”) whilst preserving capital over the medium to longer term (3-5 years).

In normal market conditions, the Sub-fund seeks to meet its objectives by investing at least 80% directly into fixed income securities. These may include investment grade and sub investment grade bonds issued by companies operating in the infrastructure sector, for example, economic infrastructure, social infrastructure and energy, waste and water infrastructure companies.

Monthly NAV Performance & Dividend

Referencing the F Accumulation class, the fund’s percentage total return for the period since the fund launch on 15th June 2023 has been 21.0% net of fees, with a percentage total return for the month of 0.33%.

Portfolio Activity & Market Commentary

The portfolio outperformed the index during the month, with the F Accumulation Class returning +0.33% versus the benchmark’s +0.22%.

November was a strong month for the fund as we navigated a busy fiscal and political backdrop. Entering the period, the portfolio was positioned defensively across both duration and credit, reflecting uncertainty around the MPC decision - where economist expectations were split - and of course the much-anticipated Budget. This served the portfolio well as it navigated the volatility following Reeves’ decision not to raise income tax, which moved yields considerably wider across the curve, and the immediate volatility following the announcement. Credit markets were similarly choppy, with renewed concerns around elevated US equity market valuations weighing on spreads. Defensive positioning served to dampen volatility through the first three weeks of the month.

Mid-month, we selectively extended duration by allocating a modest portion of the portfolio to 20- and 30-year maturities. With political risk premia unwinding post-Budget and the DMO signalling that future gilt issuance would be skewed toward shorter maturities, we viewed longer-dated yields as increasingly attractive. We added exposure to high-quality, long-dated issuers including Oxford University 2117s, Northern Powergrid 2055s and East Japan Rail 2054s. These positions were balanced with substantial ultra-short carry to help manage overall portfolio volatility.

In the primary market, it was a busy start to the month for issuers. Sterling yields in 5-years reached their cheapest issuance levels since late 2024. With conditions so firmly in the issuers' favour, we remained highly selective, avoiding transactions where valuations appeared tight or where secondary market follow-through felt uncertain. Looking ahead, we retain a 20% allocation to Near Cash Notes, providing flexibility to deploy capital as opportunities emerge. With credit spreads continuing to screen tight, we believe quality, selectivity and patience remain paramount, and we will look to redeploy this allocation opportunistically as valuations improve.

- The target benchmark for the Sub-fund is SONIA. The ACD has selected this benchmark as the ACD believes it best reflects the target returns over the medium to longer term (3 – 5 years). Investors may also compare overall performance of the Sub-fund against the IA Sterling Strategic Bond Sector. Comparison against this benchmark will give shareholders an indication of how the Sub-fund is performing against an industry wide measure of portfolios with a similar strategy. The ACD has selected this benchmark as the ACD believes it best reflects the asset allocation of the Sub-fund. This benchmark is not a target for the Sub-fund, nor is the Sub-fund constrained by the benchmark.
